

HEART HEALTH: Advances in Preventing and Treating Heart Disease

Tuesday evenings

**October 25 –
December 6
(no class
November 22)**

**7:00 to 8:30 pm
Live Streamed**

Delivered by world-renowned experts from the UCSF Health Division of Cardiology, this course will provide insights into advances in cardiology including the role of genetics, diet, exercise, and cholesterol, in preventing and treating diseases of the heart. Learn about advances in the prevention and treatment of coronary artery disease and heart attacks, abnormal rhythms such as atrial fibrillation, cardiac arrest, the failing heart, and diseases of the heart valves. Learn the latest cutting-edge research that informs daily practice as well as lifestyle factors under the direct control of patients older adults.

COURSE CHAIR

Gregory M. Marcus, MD, MAS

Professor of Medicine and Endowed Chair in Atrial Fibrillation Research
Associate Chief of Cardiology for Research
Department of Medicine, Division of Cardiology

How Can We Keep Up With the Organ Shortage?

Thursday evenings

**October 27 –
December 8
(no class
November 24)**

**7:00 to 8:30 pm
Live Streamed**

Hundreds of thousands of people in the U.S. are receiving treatment for failing kidneys, livers, hearts, and other organs. Learn about the current strategies and new advances to support, provide organs and solutions to those in need. Taught by a team of leading experts from UCSF, this course will provide an understanding of why organs fail, how they are replaced, solutions to the organ shortage and some personal reflections of organ donors.

COURSE CHAIR

Shareef M. Syed, MD, MRCS

Assistant Professor
Program Director Abdominal Transplant Fellowship
Associate Director Surgical Skills Lab
Department of Surgery, Division of Transplantation
