Finding the Sweet Spot When Caring for Vulnerable Patients

Dean Schillinger MD, UCSF Professor of Medicine in Residence
Chief, Division of General Internal Medicine
Director, Health Communications Research Program
UCSF Center for Vulnerable Populations @ SF General Hospital
Objectives

- Deconstruct the construct of vulnerable populations
- Present an integrated approach to vulnerable patients
- Demonstrate the importance of eliciting the patient’s narrative, assessing for vulnerabilities and identifying points of resilience
- Provide 3 examples of social vulnerabilities & impacts
  - Limited health literacy
  - Food insecurity
  - Intimate Partner Violence
- Find joy and a feeling of alignment in one’s work
Vulnerable Populations Defined

Vulnerable Populations are subgroups of the larger population that, because of social, economic, political, structural, geographic and historical forces, are exposed to “greater risk of risks”, and are thereby at a disadvantage with respect to their health and health care.
Exemplar Case

Ms J is a 57 yo English-speaking Latina, mother of 5, with 3 grandchildren, with high blood pressure, depression, arthritis and insulin-dependent diabetes that is poorly controlled. She presents for the first time after having been hospitalized for 3 days for hypoglycemia (low blood sugar). The hospital service was unable to identify a trigger for the hypoglycemia.

Question for you is WHY?
Mnemonic Devices Can Make you a Better Clinician!

- **M**y
- **N**eurons
- **E**rase
- **M**emory.
- **O**nly
- **N**ames
- **I**mprove
- **C**ognition
Common Social Vulnerabilities

- Violence
- Uninsured
- Illiteracy and Language
- Neglect
- Economic hardship/food insecurity
- Race/ethnic discordance, discrimination
- Addiction
- Chronic disorders, e.g. depression, dementia
- Immigrant
- Legal status
- Solation/Informal caregiving burden
- Transportation problems
- Illness Model
- Yes and Ears
- Shelter

Schillinger 2007
What are We Up Against?
Reversing The Inverse Care Law

“Access to and quality of healthcare is inversely proportional to the needs of the population”

- Tudor-Hart, 1971
“Somebody has to do something, and it's just incredibly pathetic that it has to be us.”

Jerry Garcia
3 Mechanisms Whereby Vulnerability is Associated with Poor Health

1. Disease state
2. Vulnerability
3. Therapeutic alliance
4. Health outcome

Schillinger et al McGraw-Hill 2017
Finding the Sweet Spot for Effective Intervention with Vulnerable Patients

This approach uniformly allows a clinician to navigate the social distance and create the human connection that underlies therapeutic relationships.
Eliciting the Patient’s Story: Reveals Hidden Treasures that Humanize
Finding Resilience

- Religion
- Expertise/Employment
- Social support & Network
- Intimates
- Laughter
- Institutions
- Energy & Enthusiasm
- Navigate Life’s Difficulties
- Cultural Assets
- Entertainment/Enjoyment
Common Social Vulnerabilities

- Violence
- Uninsured
- Illiteracy and Language
- Neglect
- Economic hardship/food insecurity
- Race/ethnic discordance, discrimination
- Addiction
- Mental disorders, e.g. depression, dementia
- Immigrant
- Legal status
- Isolation/Informal caregiving burden
- Transportation problems
- Illness Model
- Yes and Ears
- Shelter

Schillinger 2007
What is Health Literacy?

“What the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make [informed] health decisions.”

- 3 domains: oral (speaking, listening); written (reading, writing); numerical (quantitative)
- Web? Patient portals?
- Capacity/Preparedness ↔ Demand Mismatch

Schillinger Am J Bioethics 2007
Patients with Diabetes and Low Literacy Less Likely to Know Correct Management

Need to Know:
symptoms of low blood sugar (hypoglycemia)

Need to Do:
correct action for hypoglycemic symptoms

Williams et al., Archive of Internal Medicine, 1998
Limited Health Literacy Patients Experience More Serious Hypoglycemia/year  \( N>14,000 \)

[Graph showing the percentage of patients experiencing problems in learning, help reading, and not confident with forms for adequate and limited health literacy.]

\[ P \text{ for all}<0.001 \]

Sarkar, Adler, Schillinger, JGIM 2010
Exemplar Case: Clearly this was Limited Health Literacy, right?

- Ms J is a 57 yo English-speaking Latina, mother of 5, with 3 grandchildren, with high blood pressure, depression, arthritis and insulin-dependent diabetes that is poorly controlled. She presents for the first time after having been hospitalized for 3 days for hypoglycemia (low blood sugar). The hospital service was unable to identify a trigger for the hypoglycemia.
Common Social Vulnerabilities

Violence
Uninsured
Illiteracy and Language
Neglect
Economic hardship/ food insecurity
Race/ethnic discordance, discrimination
Addiction
Rain disorders, e.g. depression, dementia
Immigrant
Legal status
Solation/Informal caregiving burden
Transportation problems
Illness Model
Yes and Ears
Helter

Schillinger 2007
The Old Face of Hunger

- The uneasy or painful sensation caused by lack of food, or the recurrent and involuntary lack of access to food.
The limited or uncertain

- availability of nutritionally adequate and safe foods or
- ability to acquire acceptable foods in socially acceptable ways
Cycles of Food Adequacy & Inadequacy Wreak Havoc

Compensatory Strategies during Food Adequacy
Avoidance of food waste
Systematic overconsumption

Compensatory Strategies during Food Shortage
Skipped meals
Reduced caloric intake

Hyperglycemia
Hypoglycemia

Cycles of Food Adequacy & Inadequacy Wreak Havoc

- Compensatory Strategies during Food Adequacy:
  - Avoidance of food waste
  - Systematic overconsumption

- Compensatory Strategies during Food Shortage:
  - Skipped meals
  - Reduced caloric intake

Hyperglycemia → Hypoglycemia

Hypoglycemia & Food Insecurity

- Patients with diabetes in a safety net hospital
  - 1/3 of those who reported hypoglycemia attributed it to the inability to afford food

- Primary care patients with diabetes at community health centers (38% food insecure)
  - Blood sugar ever gotten too low because you couldn’t afford food? (33% FI vs. 5% FS)
  - Ever been to the ER because your blood sugar was too low? (28% FI vs. 5% FS)

Exemplar Case: Clearly this was Food Insecurity, right?

Ms J is a 57 yo English-speaking Latina, mother of 5, with 3 grandchildren, with high blood pressure, depression, arthritis and insulin-dependent diabetes that is poorly controlled. She presents for the first time after having been hospitalized for 3 days for hypoglycemia (low blood sugar). The hospital service was unable to identify a trigger for the hypoglycemia.
Common Social Vulnerabilities

- Violence
- Uninsured
- Illiteracy and Language
- Neglect
- Economic hardship/food insecurity
- Race/ethnic discordance, discrimination
- Addiction
- Mental disorders, e.g. depression, dementia
- Immigrant
- Legal status
- Isolation/Informal caregiving burden
- Transportation problems
- Illness Model
- Yes and Ears
- Shelter

Schillinger 2007
What is intimate partner violence (IPV)?

PATTERN of abusive behaviors

- including physical, sexual, verbal, emotional, economic, and/or psychological abuse
- Includes interfering with medical care
- used by adults or adolescents
- against current or former intimate partners, and sometimes against other family members
- in ANY intimate relationship: LGBTQ/straight/all gender identities
Ms J is a 57 yo English-speaking Latina, mother of 5, with 3 grandchildren, with high blood pressure, depression, arthritis and insulin-dependent diabetes that is poorly controlled. She presents for the first time after having been hospitalized for 3 days for hypoglycemia (low blood sugar). The hospital service was unable to identify a trigger for the hypoglycemia.
Where Have We Been?

- Deconstruct the construct of vulnerable populations
- Present an integrated approach to vulnerable patients
- Demonstrate the importance of eliciting the patient’s narrative, assessing for vulnerabilities and identifying points of resilience

- Provide 3 examples of social vulnerabilities & impacts
  - Limited health literacy
  - Food insecurity
  - Intimate Partner Violence
Care of Vulnerable Patients

“There needs to be a little Don Quixote in all health practitioners... locked in on the mission, undaunted by the doubters and the half-hearted”

- Fitzhugh Mullan, MD
TWO DEAD MEN
A Poem....

One: a refugee from Cuba.
Always in white,
Skin black and smooth,
Fitting the mold from bottom to top:
White leather shoes,
White pants,
White linen shirt,
Crowned with a Havana,
Of course.

The other: tall, lanky,
Happy and old.
A former ball player
In the West Coast Negro League.
Pitched for the Sea Lions
Until he threw his shoulder
Out of its socket,
And could throw no more.
The First: always smiling, 
Laughing even. 
Gold sparkling from a tooth. 
Bejeweled with bling 
Like epaulettes 
From his favorite pastime: 
Reno with Maria

The Second: never sure of his age, 
Either 93 or 88, 
His Louisiana birth certificate, 
Unable to read it, 
But he knows it bears false witness. 
Keeps his daughter's number safe: 
Pearline - on the inside brim 
Of his omnipresent 
Baseball cap.
The Former: still alive
'Cause he quit tobacco 25 years ago
After being filleted open
To plumb his heart.
    Proud of his medical survival skills,
And grateful for his doctor.
While smacking his big round belly,
Pregnant with hope and worry.

The Latter: still alive
'Cause he quit smoking 25 years ago
After being told his lungs are vanishing.
Owe my life to my doctor,
So he says and so he believes.
Now chained to an oxygen tank,
Not sure if it's worth it,
Anymore.
Two Brothers, 
Resilient, 
Living in parallel, 
Struggling in parallel, 
Full lives behind them. 
Now both suddenly dead, 
Within days of each other. 
Leaving behind their doctor

How can it be 
That these two men, 
Bedeviled by society 
Could become the favorites 
Of their doctor?

What can fill the absences, 
When one is robbed of one's favorites 
And their love is lost?
END
